Notes & Details

This Vigor 12, 18, and 22 qt. translucent round polypropylene food storage container lid makes it easy to store ingredients, as well as fully prepared food in a color-coded establishment. This food storage container lid is designed specifically to work with all 12, 18, and 22 qt. Vigor round food storage containers, allowing flexibility between any style of container in use. This lid easily identifies product, reduces the risk of cross-contamination, and enhances food safety. Use it to cover freshly chopped fruit salad, sliced vegetables, soup stock, or stew.

When paired with a compatible container (sold separately), this lid keeps food fresher for longer than when covered with traditional foil or plastic wrap. Plus, it will offer a safe, secure seal to prevent outside contaminants from getting in and messes from getting out. With this lid, you can easily identify and track the date your product was made by using the designated space labeled "date" on this lid.

The double-sealing polypropylene design gives it the strength and affordability you need in your commercial kitchen, and its easy-open design makes it perfect for restaurants, caterers, delis, and cafes. It is rated for temperatures from -40 degrees Fahrenheit to 180 degrees Fahrenheit, making it perfect for a variety of applications. Designed to withstand heavy-use applications, Vigor includes everything from stainless steel and plastic hotel pans to aluminum fry pans. Each product is built with convenient features and commercial-grade materials; with a name like Vigor, our products are sure to deliver durability!
