Type	Accessories Stock Pot Dollies

Notes & Details

Efficiently transport heavy stock pots in your commercial kitchen with this Vigor stainless steel stock pot dolly. Its high-grade, durable construction is made of corrosion-resistant 304 stainless steel consisting of chromium and nickel, ensuring long-lasting use in busy kitchen environments. With four swivel casters, this dolly maneuvers smoothly and easily around tight corners and narrow spaces when transporting heavy pots from one area to another. The hard polypropylene wheels resist cracking and tearing while distributing weight evenly to prevent floor damage. The side-locking brakes on each caster and consistent traction ensure stability and prevent any unwanted movement while in use, and the casters easily unlock with the press of a foot. Be sure the casters are locked when adding or removing contents to the stock pot to prevent accidents or spills.

Designed to fit stock pots up to 17 1/2" in diameter (sold separately), this dolly is the ideal tool for improving efficiency during food prep. When resting in the dolly, the top of compatible stock pots will come up to the perfect height for use next to a standard height work table, providing easy access while preparing soups and stocks. Simply roll it to the stock pot range once finished! Use it to effortlessly transport hot soups or large quantities of ingredients without the need for carrying heavy pots by hand.

The dolly is designed with two bottom cross braces that evenly distribute weight for reinforced stability and structural integrity, ensuring that heavy stock pots remain secure during transportation. This added security minimizes the risk of accidents and spills, increasing efficiency and reducing the risk of strain or injury. The sturdy, durable design reduces safety concerns associated with lifting and carrying heavy pots. Plus, it's the ideal height for lowering the stock pot from the range onto the dolly. You can also easily remove the stock pot from the dolly when it's time to transfer the contents. Upgrade your kitchen's efficiency and safety with this Vigor stainless steel stock pot dolly.

Vigor is dedicated to producing reliable, high-quality products made from commercial-grade materials that are built for long-lasting performance. Each product is built with convenient features, and the entire line is priced right, making name brand quality affordable!
