Features

- Direct replacement for original part
- Controls your electronic faucet's core functions

Certifications

CSA, US and Canada

Certified by NSF

Technical Data

Color	Beige
Features	NSF Certified
Type	Control Boxes Electronic Parts

Notes & Details

This Waterloo control module is a direct replacement for the one that came standard on your hands-free sensor faucet. The control module is a vital part of your faucet, managing the faucet's core functions and turning the water on and off when the sensor is activated. If your control module is broken and needs to be replaced, be sure to do so promptly.
