Notes & Details

This Waterloo matte black dual-sensor faucet is the perfect solution when you need a dependable water fixture for your facility's restrooms and hand-washing areas! It features a dual sensor foam soap dispenser and water faucet on a single-hole base, with a matte black finish that provides a contemporary and refined look wherever it's installed. The sensor is also concealed to be more aesthetically pleasing than a traditional base-mounted sensor. Made from solid brass with a matte black finish, this dual faucet provides a polished look and superior durability.

This faucet is equipped with an infrared proximity sensor with an adjustable range of 1"-6" and a rapid 0.2-second water response time. It also features a 1500 mL soap reservoir that dispenses soap in just 2 seconds. Foaming soap (sold separately) is required for use. To avoid the risk of clogging, the soap dispenser will automatically dispense soap once every 12 hours when not in use. Because a sensor activates both the soap and water flow, it has several advantages over a traditional handle-style faucet. It is hands-free, which reduces the opportunity for germs to linger, and it also prevents the faucet from running when it's not needed, which helps to cut down on your water bill.

The UL-certified AC adapter with a Level VI efficiency rating is included to provide power for the faucet's control module, which installs below the countertop and connects to the faucet with a flexible stainless steel supply line. A mixing valve also allows you to easily set the output temperature to the desired level between 41 and 158 degrees Fahrenheit. This prevents burned hands from water that is too hot, while still ensuring that the water is warm enough for users to effectively wash their hands. 9/16"-24 female connector fittings connect the mixing valve to your building's water lines.

Waterloo sensor faucets provide the industry-leading quality you expect. With a heavy brass faucet body and certifications from a wide range of national and local regulatory agencies, you can install this model with confidence. And to give you total peace of mind, it comes with a 3-year replacement warranty.
