Installation Type	Deck Mounted
Number of Faucets	1 Faucets

Technical Data		
Spout Clearance		8 Inches
Style		Push Back
Thread Type		NPT
Type		Glass Fillers
Water Inlet Size		1/2 Inches

Notes & Details

This Waterloo countertop glass filler is the perfect solution when you need a dedicated area for filling cups with fresh, clean drinking water! Designed with a 6" swing nozzle, this glass filler combines functionality with style. Providing 8" of clearance, it boasts plenty of room to accommodate all kinds of glassware, while its deck-mounted design and single hole base make it easy to install. With a dedicated glass filler, you can also give your waitstaff more flexibility by placing it in the most convenient location for your workflow.

An intuitive and familiar lever design makes it easy to use, too - just push the cup back against the lever and it will dispense from the nozzle. It's a great way to improve workflow and ensure all of your customers get a glass of clean, refreshing water. Plus, this glass filler features a lever handle connected to a swing spout for an additional way to dispense water. It installs using a 1/2" NPT male inlet. It requires a 7/8" round hole for installation and works on countertops up to 2" thick.

The base is made with high-quality 18 gauge stainless steel for outstanding durability. Plus, it comes with a drop-in grid to provide a convenient platform for your glassware or tumblers. Additionally, the drip pan is easy to install for a hassle-free user experience!

Kit Includes:

- Glass filler station base
- Glass filler with 6" swing nozzle
