Notes & Details

This Waterloo cartridge repair kit is a direct replacement for the one that came standard with select Waterloo faucets and pre-rinses. This kit contains everything you need to quickly fix a hot-side handle in a convenient cartridge design that takes less time to replace than fixing individual components. It includes a ceramic cartridge, which provides a much lower fail rate than the compression cartridges widely used in the industry. In this design, 2 ceramic discs fit together to create a watertight seal when closed. This removes the need for a rubber seat washer, which is one of the most frequently replaced parts on a faucet. It also includes a red handle index, and a replacement handle.
